PROFESSIONAL SUMMARY

Creative and self-driven AI Engineer and Full Stack Developer based in the Philippines, specializing in production-grade web applications with AI integration and MCP (Model Context Protocol) architecture. Proficient in Next.js, React, Node.js, Python, Go, and Laravel. Experienced in delivering end-to-end solutions for fintech, healthcare, logistics, and e-commerce clients. Passionate about bridging intelligent AI systems with clean, scalable full-stack engineering.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Vue.js, Angular, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Python, Go, Laravel, Django, Flask, PHP, .NET, Java, C#, REST APIs

AI & Specialized: MCP Integration, AI Engineering, LLM APIs, Prompt Engineering, Semantic Analysis

Database: PostgreSQL, MySQL, Supabase, Oracle, SQL Server

Cloud & DevOps: AWS, Docker, Vercel, Railway, GitHub

Mobile: Flutter, React Native, iOS (Swift)

WORK EXPERIENCE

Freelance AI Engineer & Full Stack Developer | Self-Employed (Remote)

Philippines-based & International Clients | 2023 – Present

- Designed and deployed full-stack web applications for local and international clients with AI integration via LLM APIs and MCP architecture.
- Built AskDocPH, a HIPAA-compliant telemedicine platform with WebSocket real-time communication, encrypted data, and appointment scheduling — deployed on Railway.
- Developed Zylo, an AI-powered content curation platform using semantic analysis and user behavior modeling, deployed on Vercel with Next.js.
- Delivered Daloy API, a scalable logistics backend with high-performance data stream management.
- Maintained diverse tech stacks including PostgreSQL, Supabase, MySQL, Docker, AWS, and Vercel per client requirements.

- Built a QR-Based POS system for local retail clients enabling contactless digital payments via dynamic QR code generation.
- Developed Gastronique, a premium e-commerce platform for local culinary businesses with product management and Tailwind CSS storefront.
- Created Nexgen, an internal rapid-prototyping framework with reusable components, reducing project delivery cycles by 40%.
- Managed full project lifecycle: requirements, UI/UX, development, testing, deployment, and post-launch support.
- Developed cross-platform mobile apps using Flutter and React Native for local business clients.
- Led development of full-stack web applications using React, Next.js, and PostgreSQL/MySQL — all deployed to live environments.
- Built cross-platform mobile solutions with Flutter and React Native, integrating cloud services and REST APIs.
- Applied cybersecurity fundamentals including authentication protocols and secure coding practices across all projects.

FEATURED PROJECTS

AskDocPH | Next.js, WebSockets, Railway, HIPAA Compliance

Telemedicine platform for the Philippines — encrypted real-time patient-doctor communication, appointment scheduling. Live: askdocph-production-4dca.up.railway.app

Zylo | Next.js, AI, Semantic Analysis, Vercel

AI-driven content curation platform with personalized feeds via user behavior modeling. Live: zylo-nextgen.vercel.app

QR-Based POS | Next.js, QR Generation, Vercel

Contactless fintech POS system for local retail via dynamic QR code technology. Live: qr-based-pos.vercel.app

Daloy API | Node.js, REST API, Railway

Scalable backend for logistics data stream management. Live: daloy-api-production.up.railway.app

Nexgen | Next.js, Component Architecture, Vercel

Rapid-prototyping framework — reduced delivery cycles by 40%. Live: nexgen-tau-weld.vercel.app

Gastronique | Next.js, Tailwind CSS, E-Commerce

Premium culinary e-commerce storefront for local businesses. Live: gastronique-orcin.vercel.app

EDUCATION

Bachelor of Science in Information Technology
Father Saturnino Urios University | Philippines
