PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 3 years of experience building scalable web and mobile applications. Combines deep expertise in modern frontend and backend technologies with advanced AI engineering skills, including LLM orchestration, AI agent development, and Model Context Protocol (MCP) integration. Known for rapid problem-solving, clean code delivery, and seamless collaboration in fast-paced, remote-first environments.

TECHNICAL SKILLS

AI & Prompt	Advanced Prompt Design (CoT, Few-shot), LLM Orchestration (Claude, OpenAI, Cursor), AI Agents, MCP
Frontend	React, Next.js (App Router), TypeScript, Tailwind CSS, shadcn/ui, Vue.js, Angular, JavaScript, CSS
Backend	Node.js, Python (FastAPI, Flask, Django), Go, PHP (Laravel), Java, C# .NET, RESTful API Design
Cloud & DB	AWS, PostgreSQL, Supabase, MySQL, SQL Server, Oracle, Docker, Vercel, GitHub Actions
Mobile & Auto	React Native, Flutter, iOS (Swift), n8n, Zapier, Make
CMS & Web	Shopify, PageFly, WordPress, Elementor, Divi, Website Migration, Server & Email Troubleshooting

WORK EXPERIENCE

Full-Stack Developer | Freelance / Remote

2022 – Present (3 Years)

- Designed and developed full-stack web applications using React, Next.js, Node.js, and PostgreSQL for clients across various industries.
- Built and deployed AI-powered features using OpenAI and Claude APIs, including chatbots, content generators, and intelligent automation workflows.
- Developed and maintained Shopify stores using PageFly, handling theme customization, product setup, and conversion optimization.
- Built and managed WordPress websites using Elementor and Divi, including custom page layouts, plugin integrations, and performance tuning.
- Set up automation pipelines using n8n, Zapier, and Make to connect CRMs, email platforms, and third-party APIs.

- Performed website migrations, server configuration, DNS management, and email troubleshooting for small to mid-sized businesses.
- Integrated Supabase for real-time data and authentication in multiple SaaS projects.
- Deployed applications on AWS, Vercel, and Docker environments with CI/CD pipelines via GitHub Actions.

NOTABLE PROJECTS

AI Agent Platform | [Personal Project](#)

2024

- Built a multi-agent orchestration system using Claude and OpenAI APIs with Model Context Protocol (MCP) for tool use and memory.
- Implemented streaming responses, conversation history, and tool-calling pipelines in a Next.js + FastAPI stack.

E-Commerce Automation System | [Client Project](#)

2023

- Developed a Shopify store with PageFly, integrated with an n8n automation backend for order processing, email triggers, and CRM sync.
- Reduced manual order handling time by over 80% through end-to-end workflow automation.

EDUCATION

Bachelor of Science in Information Technology

Philippines • Graduated 2026
